

Book.Author property is returned as 'null'

When a call to the following endpoints is made:

- GET /api/books?title={title}
- GET /api/books/{id}
- POST /api/books

the property Book.Author in the recieved response is always 'null'.

Request body:

```
{  
  "id": 2,  
  "Author": "Authot of the book",  
  "Title": "Title",  
  "Description": "des"  
}
```

Response body:

```
{  
  "Id": 2,  
  "Title": "Title",  
  "Description": "des",  
  "Author": null  
}
```

Actual result: Book.Author property is returned as 'null'.

Expected result: Book.Author property must be returned corresponding to the reuquest made.
